

CUSTOMER GUIDE

Quick Start for Manufacturer Reps

From your home page to your first sent bid, in five steps. About ten minutes end to end.

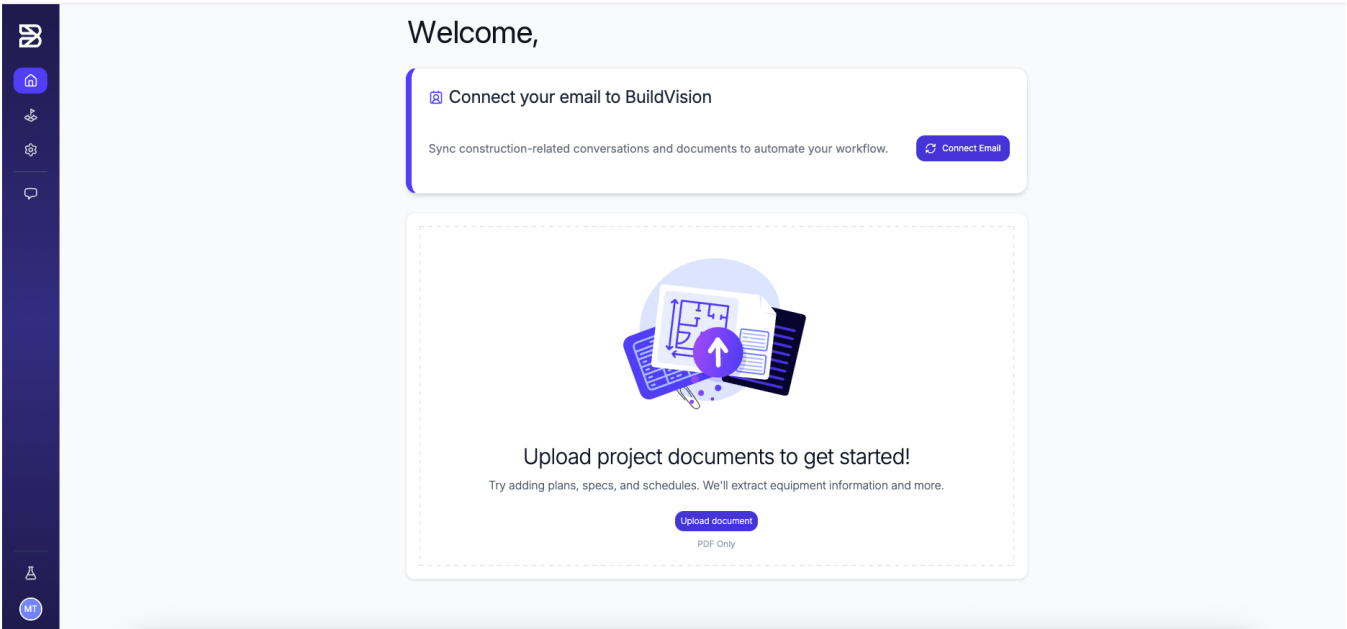

Before you start: your profile and organization should already be set up, including line cards and service areas. If they are not, finish that first. This guide walks you from your home page to your first sent bid.

What you'll do

1. Get bids flowing in — forward email or upload a document.
2. Tour your home page — notifications, projects, settings.
3. Explore the Files tab — see schedule tagging in action.
4. Submit your first bid — drag and drop your proposal.
5. Add clients and teammates — loop in your network.

Step 1 — Get bids flowing in

Three ways to feed BuildVision: connect your inbox directly, forward bids from your existing email, or drag and drop a document to try it on something specific first. Pick one path — BuildVision starts processing as soon as a bid arrives.

Step 2 — Tour your home page

Your home page is where everything surfaces: new projects, files that landed, addenda to review, and overnight extractions. Your three main areas are notifications, the projects list, and settings.

Welcome back 🙌

Activity feed

New projects, file uploads, addendums to review, and finished extractions all land here. Check it first thing each morning.

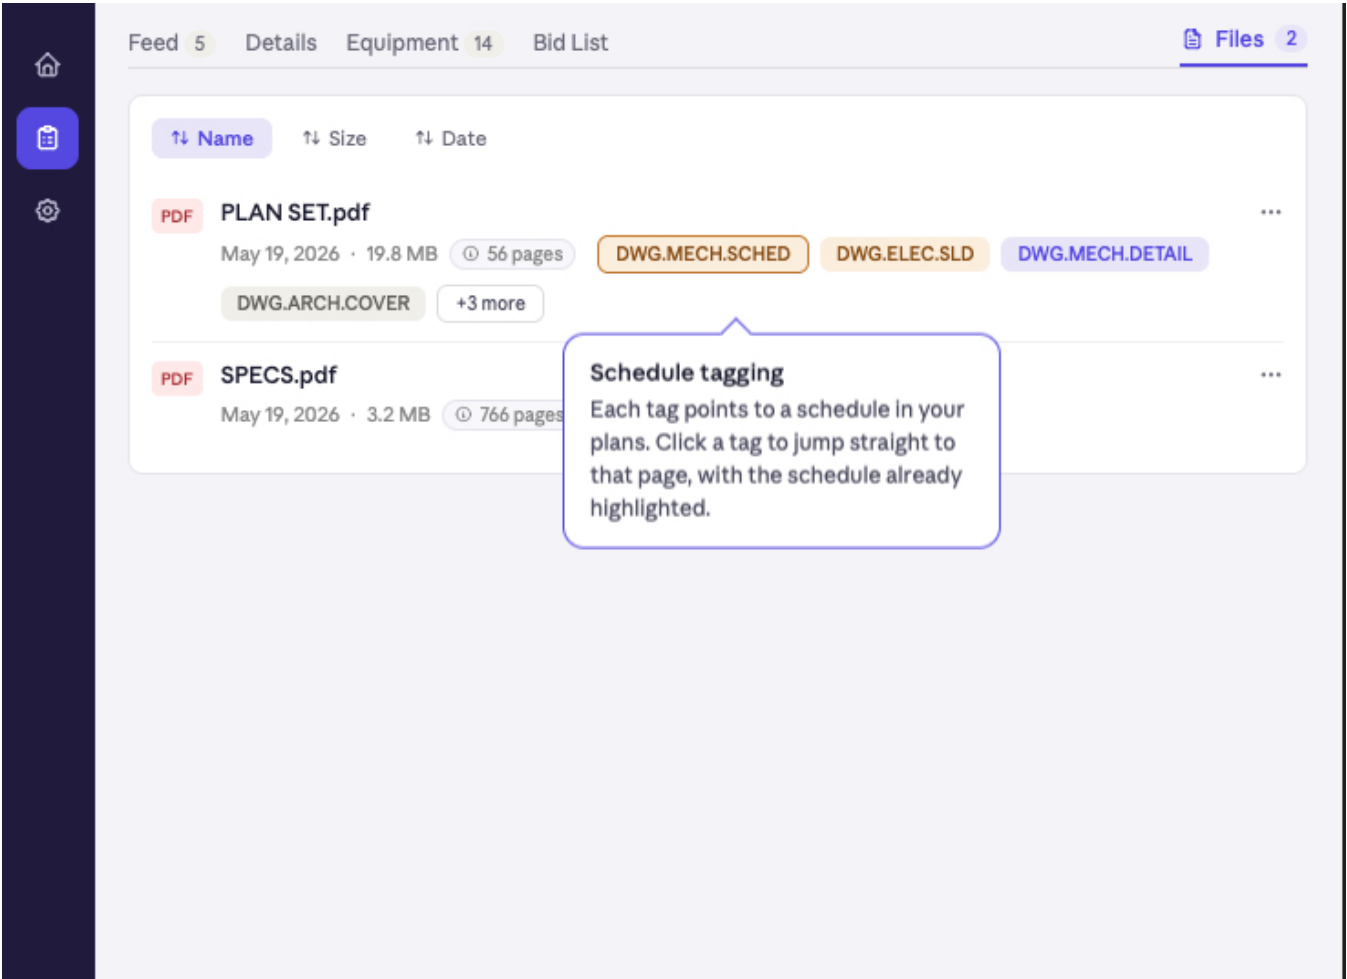

Step 3 — Explore the Equipment tab

Open a project to see the equipment BuildVision extracted from the documents — organized and ready to quote against.

Step 3 — Files & schedule tagging

In the Files tab, each tag points to a schedule in your plans. Click a tag to jump straight to that page with the schedule already highlighted.

Step 3 — Built-in PDF viewer

Review the source documents inline, without leaving BuildVision.
