

Forward Project Emails to BuildVision

Forward to: Bids@BuildVision.io

Use this address as the destination for every forwarding rule and filter in this guide.

Before You Start

- **Verification email:** Both Gmail and Outlook send a one-time verification message to Bids@BuildVision.io the first time you add the address. Email your CX lead to confirm the verification message has been received by BuildVision's team.
- **IT or admin coordination:** Some Microsoft 365 and Google Workspace accounts disable external forwarding by default. **Here are links to fix this:**
 - Google: <https://support.google.com/a/answer/14724207>
- **Microsoft 365**
 - The admin policy that approves external forwarding (this is the one that's blocked by default and causes the 5.7.520 bounce):
<https://learn.microsoft.com/en-us/defender-office-365/outbound-spam-policies-external-email-forwarding>

Setup by email provider:

[Gmail and Google Workspace](#)

[Outlook on the web](#)

[Classic Outlook desktop \(Windows\)](#)

Gmail and Google Workspace

Gmail uses a filter to forward only the messages that match your criteria. Examples include attachments, or mail from specific contractors or distribution lists.

Official Google documentation: [Automatically forward Gmail messages](#) · [Create rules to filter your emails](#).

Step 1: Add and verify Bids@BuildVision.io as a forwarding address.

Warning: Ensure you add a filter after completing forwarding or all emails will forward

1. Open Gmail on a desktop browser. The mobile app does not support forwarding setup.
2. Click the gear icon in the top right, then click [See all settings](#).

Step 2: Click the gear icon, then click "See all settings."

3. Open the [Forwarding and POP/IMAP](#) tab.
4. Under [Forwarding](#), click [Add a forwarding address](#), enter Bids@BuildVision.io, then click [Next](#) → [Proceed](#) → [OK](#).

Step 3-4: Open the Forwarding tab, then click Add a forwarding address.

5. Gmail sends a verification email to Bids@BuildVision.io. Your CX lead receives it on our side and will confirm it. Once confirmed, the address shows as verified in your settings and the next step becomes available.

Step 2: Set up a filter for project emails

A filter forwards only the messages that match criteria you define.

1. Click the gear icon in the top right, click [See all settings](#), then open the [Filters and Blocked Addresses](#) tab and click [Create a new filter](#).

2. Enter the criteria that identify project emails. Common patterns: **From** set to a specific contractor, distribution list, or domain (for example, [@contractordomain.com](#)); or **Subject** containing terms like **Bid**, **RFQ**, **Proposal**, **Quote**.
3. Check the **Has attachment box**. This ensures BuildVision receives the project documents (drawings, schedules, specifications, and any other attached files) along with the email.

Subject

Has the words

Doesn't have

Size

☒ Has attachment

[Create filter](#) [Search](#)

- Click [Create filter](#) at the bottom of the filter form.
- On the next screen, check [Forward it to](#), then select [Bids@BuildVision.io](#) from the dropdown. If you don't have the [bids@buildvision.io](#) option you need your CX to confirm it at BuildVision.

When a message arrives that matches this search:

☐ Skip the Inbox (Archive it)

☐ Mark as read

☐ Star it

☐ Apply the label:

☒ [Forward it to:](#)

☐ Delete it

☒ [Also apply filter to matching conversations.](#)

[Create filter](#)

Steps 5-6: Check Forward it to (select Bids@BuildVision.io), and check Also apply filter to matching conversations.

- Check [Also apply filter to matching conversations](#). This is important: it forwards any existing project emails already in your inbox so BuildVision has the full context from day one. New emails matching the filter forward automatically from this point on.

Warning - If you have many emails that match, google does not offer a time bound filter. All matching emails will be sent to BuildVision. Only the past 30 days of emails will get extracted or a time agreed upon in your pilot contract.

- Click [Create filter](#) to save.

Tip: layer multiple filters

You can create more than one filter to cover different sources (for example, one filter per major contractor or one for each project distribution list). All matching messages forward to Bids@BuildVision.io without duplicating. Edit or remove filters anytime under **Settings → Filters and Blocked Addresses**.

Official Google documentation: [Automatically forward Gmail messages](#) · [Create rules to filter your emails](#).

Outlook and Microsoft 365

Outlook on the web

Official Microsoft documentation: [Use rules to automatically forward messages](#) · [Turn on automatic forwarding in Outlook](#).

Step 1: Set up a rule for project emails

1. Open Outlook on the web at outlook.office.com (or outlook.live.com for personal accounts) and sign in.
2. Open **Settings → Mail → Rules**, then click **Add new rule**.

Step 2: Open Settings → Mail → Rules, then click Add new rule.

3. Give the rule a clear name (for example, **Forward bids to BuildVision**).
4. Add a condition. Common choices: **From** a specific contractor or domain; **Subject includes** terms like **Bid**, **RFQ**, **Proposal**, **Quote**; or **Has attachment**.

Step 2: Add and verify Bids@BuildVision.io as forwarding action.

5. Add an action: choose **Forward to**, then enter Bids@BuildVision.io. Avoid the **Redirect to** option, which strips your team's name from the message and replies go back to the original sender, not to your inbox.

Add a rule

Name your rule

Forward bids to BuildVision

Add a condition

Subject includes ▼ Bid, RFQ, Proposal, Quote

Add an action

Forward to ▼ Bids@BuildVision.io

Choose **Forward to** (not **Redirect to**). Forward keeps replies coming back to your team.

Cancel Save

Steps 4-5: Add a condition, then choose Forward to and enter Bids@BuildVision.io.

6. Click **Save**. The rule starts applying to new incoming messages immediately.

Classic Outlook desktop (Windows)

On the **File** tab, click **Manage Rules & Alerts**, then click **New Rule**.

Step 1: From the File tab, click Manage Rules & Alerts.

1. Choose **Apply rule on messages I receive** and click **Next**.
2. Select your conditions (for example, **from people or public group** for specific contractors, or **with specific words in the subject** for terms like **Bid, RFQ, Proposal, Quote**), then check **forward it to people or public groups** under actions.

Rules Wizard

Step 1: Select action(s)

- ☐ move it to the specified folder
- ☐ assign it to the category
- ☐ delete it
- ☒ forward it to people or public group
- ☐ redirect it to people or public group
- ☐ play a sound

Step 2: Edit the rule description (click an underlined value)

Apply this rule after the message arrives
forward it to people or public group

Step 3: Check "forward it to people or public group," then edit the underlined link.

3. Click the underlined **people or public group** link in the rule description, type Bids@BuildVision.io in the To field, and click **OK**.
4. Click **Finish**, then **Apply**.

Official Microsoft documentation: [Use rules to automatically forward messages](#) · [Turn on automatic forwarding in Outlook](#).

Need Help?

Your CX lead is your first call for anything related to forwarding setup, project ingestion, or document handling. For everything else, email support@buildvision.io.
