

Load the Product Catalog (“Representation”)

A quick guide to building your Line Card — the list of manufacturers your organization represents in BuildVision.

1

Open Settings

Click the **settings wheel** (gear icon) in the **bottom-left corner** of the page.

2

Go to the Representation tab

In the Settings menu, click the **Representation** tab.

3

Click Edit

Click the **Edit** button in the top-right corner of the page to open the **Manufacturer Representation** window.

4

Select your product lines

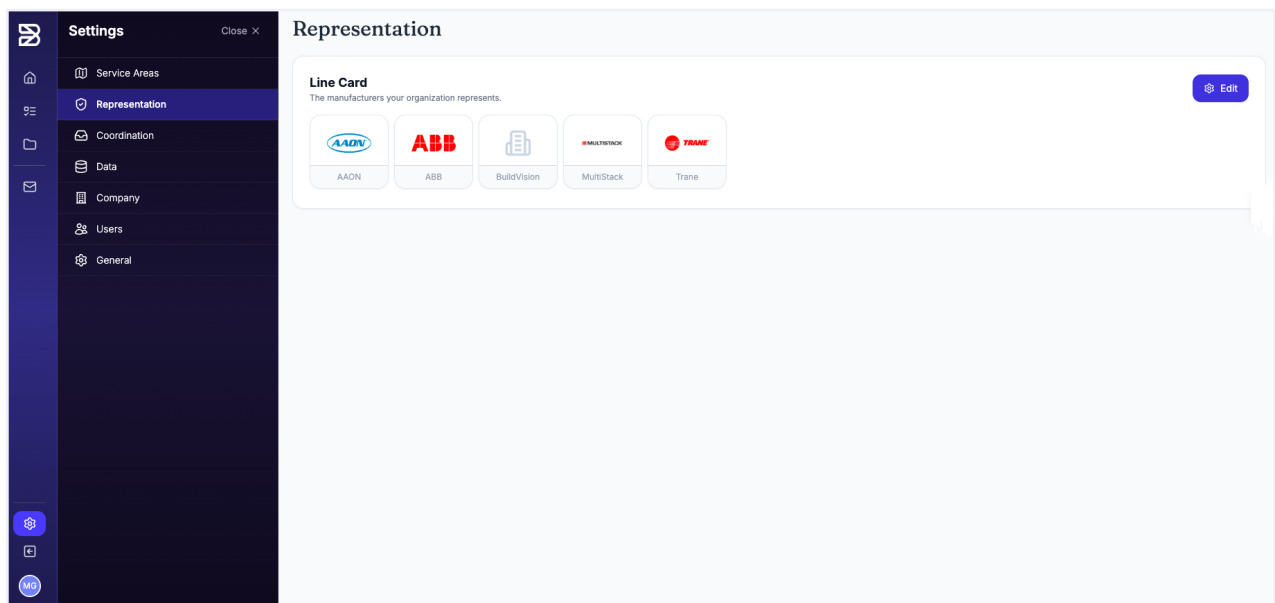

Search for and select the manufacturers you currently represent. Click the **+** next to a manufacturer to add it (and the **–** to remove one).

5

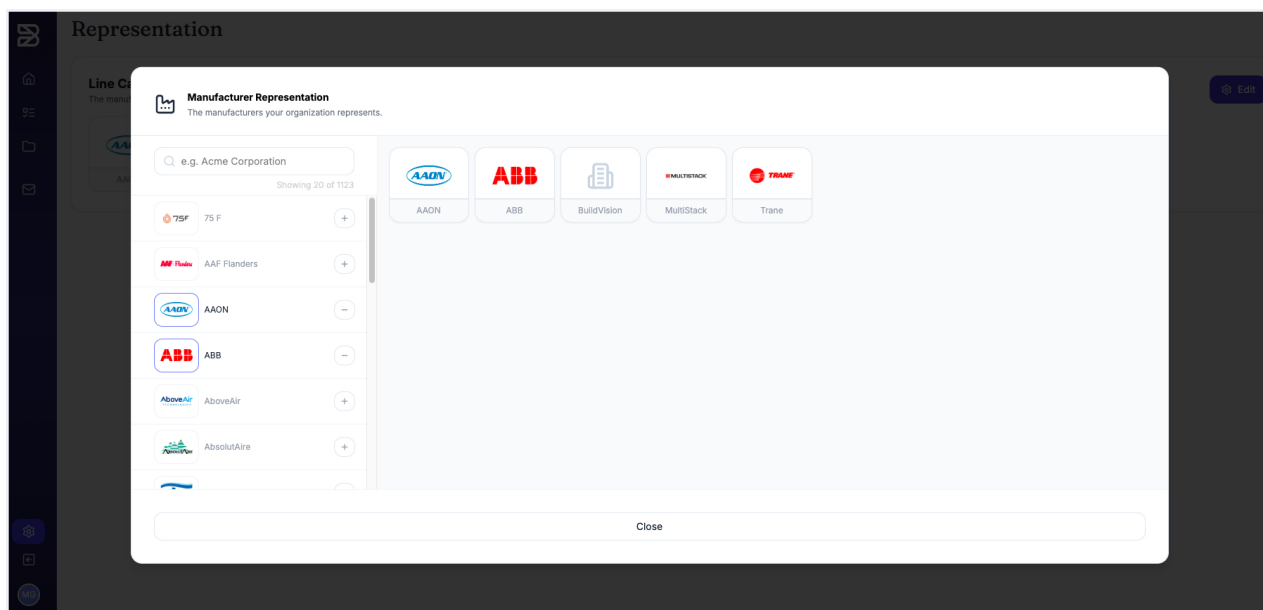

Finish — no save needed

Each manufacturer you add appears automatically on your **Line Card**. There is no save button, so once you've added all your product lines, just click **Close**.

Tip: Changes save automatically as you add or remove manufacturers — clicking **Close** simply exits the window; it does not discard your selections.

Steps 1–3: The Representation tab showing the Line Card, with the Edit button in the top-right.

Steps 4–5: The Manufacturer Representation window — add lines with +, and they appear on your Line Card automatically.
