

CUSTOMER GUIDE

Quick Start for Manufacturer Reps

From your home page to your first sent bid, in five steps. About ten minutes end to end.

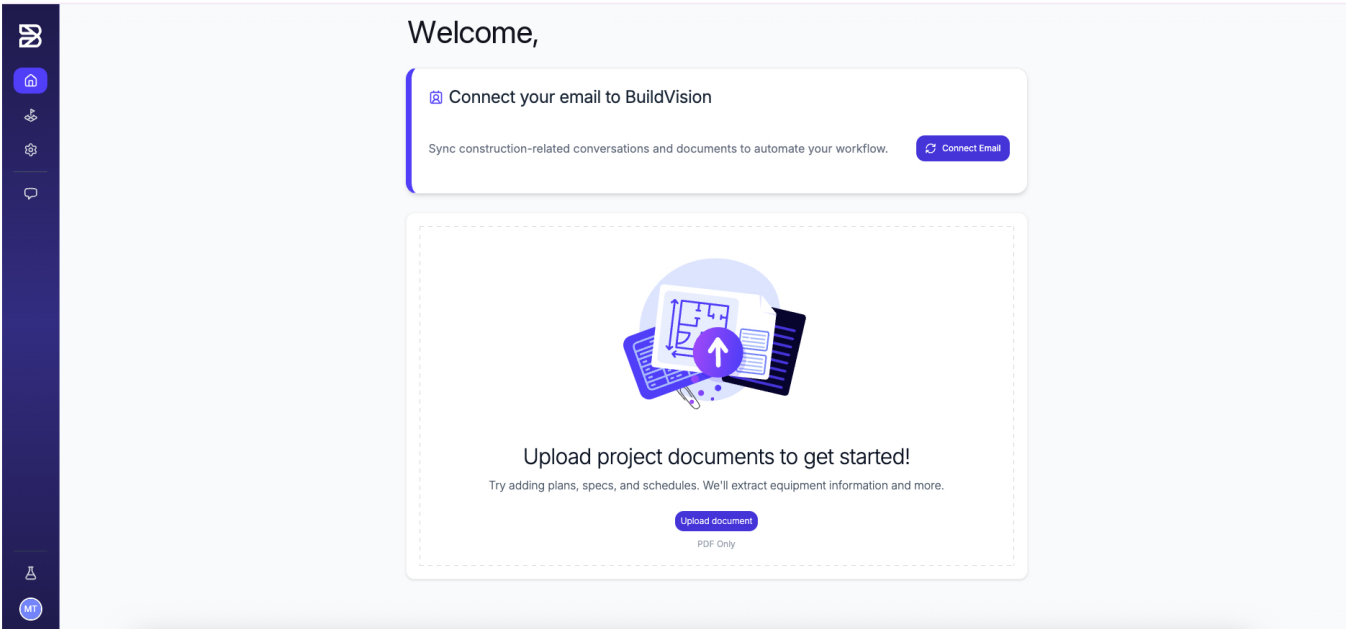

Before you start: your profile and organization should already be set up, including line cards and service areas. If they are not, finish that first. This guide walks you from your home page to your first sent bid.

What you'll do

1. Get bids flowing in (2 min) — forward email or upload a document.
2. Tour your home page (1 min) — notifications, projects, settings.
3. Explore the Files tab (2 min) — see schedule tagging in action.
4. Submit your first bid (3 min) — drag and drop your proposal.
5. Add clients and teammates (2 min) — loop in your network.

Step 1 — Get bids flowing in

There are three ways to feed BuildVision: connect your inbox directly, forward bids from your existing email account, or drag and drop a document if you want to try it on something specific first. Pick one path — whichever you choose, BuildVision starts processing as soon as a bid arrives.

Step 2 — Tour your home page

Your home page is where everything surfaces: new projects, files that landed, addenda you need to review, and extractions that finished overnight. Your three main areas are notifications, the projects list, and settings.

Welcome back 🙌

Step 3 — Explore the Files tab

Open a project's Files tab to see schedule tagging in action. Each tag points to a schedule in your plans; click a tag to jump straight to that page, with the schedule already highlighted.

Step 4 — Submit your first bid

When you are ready, submit your proposal against the project. Review the bid list, then drag and drop your proposal to send it.
