

Place Each User in the Correct Org Node

A quick guide to assigning a user to the right organization within your BuildVision account structure.

1

Open Settings

Click the **settings wheel** (gear icon) in the **bottom-left corner** of the page.

2

Go to the Users tab

In the Settings menu, click the **Users** tab.

3

Open the user's actions

Find the user in the list and click the **actions** menu — the three dots (•••) on the far right of their row.

4

Select Manage

In the actions menu, click **Manage** to open the user's Root Account view.

5

Choose Add to Org

Click the **actions** icon again and select **Add to Org**.

6

Select the org and save

In the **Create Sub-User Account** dialog, choose the appropriate organization for the user, then click **Add User** to save.

Tip: Adding a user to an org node grants them access to that organization — you can place the same user in more than one org if they need access across multiple nodes.
